Lymphoma Summit

Improving lymphoma outcomes in Victoria

Clinicians involved with providing care to lymphoma patients are invited to attend a summit to identify priorities for improving outcomes for people with lymphoma.

This clinician-led summit will identify priorities for improvement and agree on goals and measures for the next two years. Local multidisciplinary teams and Integrated Cancer Services will support the work on improvements that arise from the summit.

The lymphoma summit is the third in a series of tumour specific summit meetings hosted collaboratively by Victoria's Integrated Cancer Services and Cancer Council Victoria.

Make a difference by contributing your expertise to help shape future lymphoma care in Victoria

Discussion topics include:

- Multidisciplinary approach to treatment
- Referral pathways to specialist care
- Access to Supportive care
