Registration opens at 8.30am

A light lunch will follow

# Oesophagogastric Cancer Summit

**Ever think things could be better for patients with oesophagogastric cancer?  
Are you a member of an UGI cancer MDM?**

## **Then register for the Oesophagogastric Cancer Summit**

This event is one of a series of tumour specific summits hosted by the Victorian Integrated Cancer Services in collaboration with the Cancer Council Clinical Network and the Department of Health and Human Services.

Clinicians are invited to discuss data on patterns of diagnosis, treatment planning and treatment for patients with oesophagogastric cancer living in different regions of Victoria and treated in public and private health services.

This is your chance to agree one or two short-term priorities for practical action to be supported by the Victorian Integrated Cancer Services.

## **Make a difference by contributing your expertise!**

### **Discussion topics:**

- Incidence and survival
- Multidisciplinary approach to treatment planning
- Treatment options for all stages of oesophagogastric cancer

A clinical working party co-chaired by Paul Cashin and Ahmad Aly is overseeing the preparation of the data to inform the summit discussion.
