

Pancreatic Cancer 2021 Summit

Friday 22 October

9.00am–1.15pm

This forum will be held online
via Zoom

Co-chaired by

A/Profs

Charles Pilgrim and Niall Tebbutt

You are invited to participate in the Pancreatic Cancer 2021 Summit

Victorian Tumour Summits

Can treatment pathways be better for patients with pancreatic cancer?

Do you treat and care for patients with pancreatic cancer?

Are you a member of a pancreatic cancer MDT?

The Victorian **Pancreatic Cancer 2021 Summit** is a tumour-specific forum for health professionals to identify gaps in and improvements to cancer care. Clinicians are invited to discuss data trends in diagnosis, treatment planning and care for Victorian public and private patients with pancreatic cancer.

Discussion topics include:

- treatment pathways and outcomes for pancreatic cancer
- access to treatment
- the consumer experience and consumer-agreed opportunities for improvement

Co-chaired by A/Profs Charles Pilgrim and Niall Tebbutt, the Pancreatic Cancer 2021 Summit Clinical Working Party reviews statewide data to inform summit discussion. This event is hosted by Victorian Integrated Cancer Services and supported by the Department of Health.
